INTRO

Welcome to the 2023 Annual Questionnaire!

PLEASE READ THIS

Welcome to The PRIDE Study's 2023 Annual Questionnaire. We really appreciate your willingness to help us understand LGBTQIA+ health over time and advance scientific knowledge about the health of LGBTQIA+ people!

One of The PRIDE Study's goals is to create a comprehensive understanding of our LGBTQIA+ communities' physical, mental, and social health. To do that, we ask many questions.

Part of creating a comprehensive understanding of physical, mental, and social health is understanding how health changes over time. This questionnaire is about your experiences in the **LAST 12 MONTHS**. Some questions were asked in previous questionnaires or may be similar to questions in the "My Profile" and "My Health" sections of The PRIDE Study as well as The PRIDE Study's Lifetime Health & Experiences Survey. We apologize for what seems like duplicated questions. However, asking these questions is important to make comparisons to the overall US population and to understand your health over time.

Many questions are routinely asked in national health surveys. In some cases, we have modified these questions. While these questions may not use perfectly appropriate language for LGBTQIA+ communities, we use these questions so that we can make comparisons to the overall US population.

As a reminder, your answers are confidential and cannot be used against you. To protect your privacy, we have obtained a Certificate of Confidentiality from the National Institutes of Health. We can use this Certificate to legally refuse to disclose information that may identify you in any federal, state, or local civil, criminal, administrative, legislative, or other proceedings (for example, if there is a court subpoena).

INTRO2 HOW TO SAVE YOUR SURVEY TO FINISH LATER

We estimate that this Annual Questionnaire will take about 35-60 minutes to complete.

While we recommend that you complete the survey in one sitting, you can start the survey and finish it later by selecting "Save and Exit" in the upper-right corner of the screen. You will return to your Dashboard.

To return to the survey, click on the "Continue" button for the survey you wish to continue.

INTRO3 We are collecting data for the purposes of research only and not to diagnose or treat a medical condition, nor to provide medical care or support of health needs. Responses provided here are not monitored in real time. If you feel distress at any point in the survey, please seek medical support. Here are some national resources but local ones in your area may also be available: The National Suicide Prevention Lifeline can be reached at 1-800-273-8255 or check out their materials including a 24/7 Lifeline and an online chat function at www.suicidepreventionlifeline.org. The LGBT National Hotline can be reached at 1-888-843-4564 or www.glbthotline.org. Please reach out to talk with someone. Go to the emergency room or call 911 if you are in crisis and don't know where to get help.

SAAB What was the sex assigned to you at birth, for example on your original birth certificate?

Why are we asking this

The PRIDE Study asks for sex assigned at birth (on original birth certificate) because this information is needed for us to understand better the health risks of specific LGBTQIA+ communities, for example people who are cisgender, transgender, non-binary, or another gender. This lets us better understand the health of specific LGBTQIA+ communities.

ORGAN_INTRO The next set of questions mentions body organs. We are asking these questions to get a comprehensive look at your health. We know that people refer to their organs differently, and we have tried to use the medical terms as well as commonly used non-medical terms. We know that this will not accurately reflect all the diversity of our communities, but we hope it gets us closer to some critical health understanding.

ORGANS_BORN To understand your health and customize this survey for you, we need to know what organs you were born with. People have a wide range of language or terms for their physical anatomy (not all of which are listed here). Which of the following organs were you **born** with? (Check all that apply.)

- Cervix (you likely have/had this if you were assigned female sex at birth) (1)
 - Ovaries (2)
 - Penis/Phallus (made of flesh and permanently connected to your body) (3)
 - Prostate (you likely have/had this if you were assigned male sex at birth) (4)
 - Testicles (5)
 - Uterus/Womb (6)
 - Vagina/Frontal genital opening (7)
-

ORGANS_BREASTS Have you **EVER** had breasts or breast tissue?

HEIGHT What is your current height in feet and inches? If you don't know, please give your best estimate.

Feet (1) _____

Inches (2) _____

WEIGHT What is your current weight in pounds (lbs)? If you don't know, please give your best estimate.

ZIP_AQ What is your ZIP code? (This is the 5-digit code that helps direct U.S. Mail to you.)

CYOA We are asking the following question so we can better customize this questionnaire for you.

We have three versions available. A version for people who identify as a gender minority person (for example, genderqueer, non-binary, questioning one's gender identity, transgender, etc.) that will ask about gender identity/expression. A version for people who identify as a sexual minority person (for example, asexual, bisexual, gay, lesbian, queer, questioning one's sexual orientation, etc.) that will ask about sexual orientation. A version for people who identify as both a gender and sexual minority person that will ask about gender identity/expression and sexual orientation.

Please choose the option that you think is best for you. A version for:

- Gender minority people (for example: genderqueer, non-binary, questioning one's gender identity, transgender, etc.) (1)
- Sexual minority people (for example: asexual, bisexual, gay, lesbian, queer, questioning one's sexual orientation, etc.) (2)
- People who identify as both a sexual AND gender minority person (3)

INTRO_OUTRO You have completed the Introductory Block of the Annual Questionnaire. Thank you!

You will now be taken to complete either the Social Health, Mental Health, or Physical Health Blocks. These blocks are assigned randomly. Completing each of these blocks will give us a complete picture of your health and help us work towards health equity for LGBTQIA+ people!

While we encourage you to complete all blocks in one sitting, you can save and continue at a

later time if you need. To do this, click on "Save and Exit" in the upper-right hand corner. You will return to your Dashboard.

End of Block: Introductory Block

Start of Block: Mental Health

MH_INTRO This section is meant to give us a sense of your general mental health by asking about specific diagnoses, conditions, symptoms, and behaviors. This is one of 4 sections in the Annual Questionnaire.

Many of these questions are standard questions routinely asked in national health surveys. Your honest answers will help us as we study LGBTQIA+ health in The PRIDE Study in order to improve the health and well-being of our communities. Please do your best to answer every question, but you may skip questions that feel too uncomfortable to answer. This section should take about 10-15 minutes to complete.

While we recommend that you complete the entire Annual Questionnaire in one sitting, you can pause the survey to complete at a later time by selecting "Save and Exit" in the upper-right corner. If you select this option, please do come back later. Completing the whole questionnaire means we have more power to advance LGBTQIA+ health.

Thank you for making a difference!

MH_OUTRO You have completed the Mental Health section! This is one of 4 sections! Thank you for the time and energy you have put into helping us understand LGBTQIA+ people's diverse and vibrant lives as we work towards helping LGBTQIA+ people thrive! Your answers are bringing us closer to health equity for LGBTQIA+ people. Thank you!

End of Block: Mental Health

Start of Block: Social Health Block

SH_INTRO This section is meant to give us a sense of your social health, or understanding how you are doing with your relationships to the people and communities around you. We ask questions about employment and housing, how you interact with various people who you meet or know, etc. This is one of 4 sections in the Annual Questionnaire.

Some of these questions are standard questions routinely asked in national surveys. Your honest answers will help us understand the overall health of our communities. Please do your best to answer every question, but you may skip questions that feel too uncomfortable to answer. This section should take about 10-15 minutes to complete.

While we recommend that you complete the entire Annual Questionnaire in one sitting, you can pause the survey to complete at a later time by selecting "Save and Exit" in the upper-right corner. If you select this option, please do come back later. Completing the whole questionnaire means we have more power to advance LGBTQIA+ health. Thank you for making a difference!

SH_OUTRO You have completed the Social Health section! This is one of 4 sections! Phew! We know this survey is long and we thank you for the time and energy you have put into helping us advance our collective understanding of LGBTQIA+ health. Your answers are bringing us one step closer to LGBTQIA+ health equity!

End of Block: Social Health Block

Start of Block: Physical Health Block

PH_INTRO

This section is meant to give us a sense of your **physical health**. We ask questions about your physical activity, sex life, health insurance, cancer screening, vaccinations, pregnancies, and use of birth control. This is one of 4 sections in the Annual Questionnaire.

Many of these questions are standard questions routinely asked in national health surveys. Your honest answers will help us as we study LGBTQIA+ health in The PRIDE Study in order to improve the health and well-being of our communities. Please do your best to answer every question, but you may skip questions that feel too uncomfortable to answer. This section should take about 15-20 minutes to complete.

While we recommend that you complete the entire Annual Questionnaire in one sitting, you can pause the survey to complete at a later time by selecting "Save and Exit" in the upper-right corner. If you select this option, please do come back later. Completing the whole questionnaire means we have more power to advance LGBTQIA+ health. Thank you for making a difference!

PH_INTRO2 Although this list of conditions may seem to repeat what you may have filled out as part of "My Health," we want to make sure everything is as up-to-date as possible.

COLON_TEST Colon or rectal cancer tests include blood stool tests, colonoscopy, and sigmoidoscopy.

A blood stool test or occult blood test, also known as the fecal immunochemical (FIT) test, determines whether you have blood in your stool or bowel movement. These tests can be done at home using a kit. You use a stick or brush to obtain a small amount of stool at home and send it back to the doctor or lab.

A sigmoidoscopy and colonoscopy are exams in which a tube is inserted in the rectum to view the colon for signs of cancer or other health problems. For a sigmoidoscopy, the doctor checks only part of the colon and you are fully awake. For a colonoscopy, the doctor checks the entire colon, and you are given medication through a needle in your arm to make you sleepy, and told to have someone drive you home. Before a sigmoidoscopy or colonoscopy, you are asked to take a medication that intentionally causes diarrhea.

BC_INTRO Now we would like to ask you a few questions about "birth control." We acknowledge that "birth control" can be used by people for different things. Some people use "birth control" to avoid getting pregnant. Other reasons people use "birth control" include things like gender affirmation, stopping having periods, clearing up their skin, reducing body hair, preventing sexually-transmitted infections, or controlling symptoms related to menopause.

SEXHEALTH_INTRO In the following questions, we ask about various types of sex, sexual behaviors, and or sexual activities. Some questions are based on questions you answered earlier in the survey about health experiences or body parts. We know that the questions posed here are not exhaustive of the type of sex people have. We also know that the language we use for body parts or activities may not work for everyone. We are working hard not to prioritize or validate certain types of sex over other types of sex. We also wish to make the language we use as accessible as possible while still allowing for meaningful data comparison to other studies, so as to bring visibility to our communities.

If there are sexual activities or experiences that are important to you that we have missed, there is a question at the end of the block where you can tell us more. Thank you for sharing with us and helping us advance knowledge about LGBTQIA+ health together.

PH_OUTRO You have completed the Physical Health Block! This is one of 4 blocks! WOOHOO - another one done! Each block you complete helps us understand LGBTQIA+ people's unique lives and health experiences as we work towards helping LGBTQIA+ people thrive. Thank you for bringing us closer to health equity for LGBTQIA+ people.

End of Block: Physical Health Block

Start of Block: Miscellaneous Block

MISC_INTRO This final section asks additional questions about you, such as political views and your military service. Your honest answers will help us understand the overall health of our communities. Please do your best to answer every question, but you may skip questions that feel too uncomfortable to answer. This section should take about 5 minutes to complete. While we recommend that you complete the survey in one sitting, you pause the survey to complete later by selecting "Save and Exit" in the upper-right corner.
